

Engine Installation Best Practices

When installing a remanufactured engine it is recommended the following items be replaced: (if not already included)

- Engine Oil (Check vehicle specification)
- Air Filter
- Oil Filter
- Fuel Filter
- Spark Plugs
- Plug Wires(if applicable)
- Distributor Cap (if applicable)
- Rotor (if applicable)
- Antifreeze/Coolant
- Thermostat
- Radiator Cap
- Radiator Hoses
- Belts
- PCV Valve, PCV Grommets and Hoses (if applicable)
- Oil Pump (If not included)
- Pick up tube

Inspected, cleaned and/or replaced prior to installation:

- Carburetor or Fuel Injection System
- Distributor (if applicable)
- Radiator
- Water Pump
- Intake and Exhaust manifolds
- EGR Valve
- Harmonic Balancer
- Flex-Plate or Flywheel
- Valve Cover (if not included)
- Timing Cover (if not included)
- Oil Pan (if not included)
- Engine Mounts
- Transmission Mounts

Additional recommended items:

- Repair Manual
- Oil Pressure Gauge
- Torque Wrench
- Engine Oiler
- Degreaser
- Shop Towels
- Hand Cleaner
- Engine Cleaner
- Thread Sealant

Note: Inspect for faulty or improperly installed items that can void the Remanufactured Engine Warranty.
